

It's a degree, that defines the creed
Of the wish of others haunted by their greed

Clear the enigma to save me from dead
Fuck them meds and put a bullet in your head
The abuse of myself is another mistake
Fanatic goals into the fucking grave

Save me before i fall apart
Because the expectations go way to far
Save me before i fall apart
Because the expectations go way to far

You are alone in your conspiracy
Blinded myself, this is your own tragedy

Clear the enigma to save me from dead
Fuck them meds and I put a bullet in your head
the abuse of myself is another mistake
fanatic goals into my fucking grave

Save me before i fall apart
Because the expectations go way to far
Save me before i fall apart
Because the expectations go way to far

I thought you had some real good fun
Reload the gun to get it done
The long run has just begun
This is the day
The day you can't get away
The final day you can't delay
This seems like
This seems like you're out of luck
Don't get stuck
I don't give a fuck
(I don't give a fuck)

I don't rely on false made prophecies
I don't rely on apologies
I don't rely on false made ideologies
I rely on my qualities

Save me before i fall apart
Because the expectations go way to far
Save me before i fall apart
Because the expectations go way to far
